Integrated business solutions

Integra Mobile: Approvals on the go

With the Integra Mobile interface users can access their Integra financial data anytime, anywhere thus keeping up with the fast-paced business world around them.

Being away from your desk is no longer a reason to cause a delay in the workflows you are involved in. Performing your key tasks through your mobile device will allow you to maintain a seamless service at all times.

Instant access to your approval tasks

When time is of the essence and you want to catch-up with your tasks no matter where you are, the ability to go through your approval tasks will allow you to keep on top of your work. With an easy-to-use interface you can quickly approve, reject and review details of requisitions, orders and invoices on your mobile device. Should you require more detailed information you can still drill down into line item details and open up any relevant attachments.

Easy and secure access

Using your Android® or Apple® device you can activate notifications of key events by email. Clicking the link in an email then launches the device's web browser and opens up a secure login to Integra Mobile. All access and security is controlled via the core application and you can be confident that your actions are immediately synchronised with the full Integra installation.

Benefits

- Mobile access wherever and whenever
- Improved efficiency and reduction in delays
- Provides an instant overview of tasks pending approval
- Allows revision of documents that are crucial for the approval process
- Improvement of response times and the overall service delivered to internal and external stakeholders
