

CAPITA

Integra Reach

the new unified, flexible, agile
and cost effective ERP solution

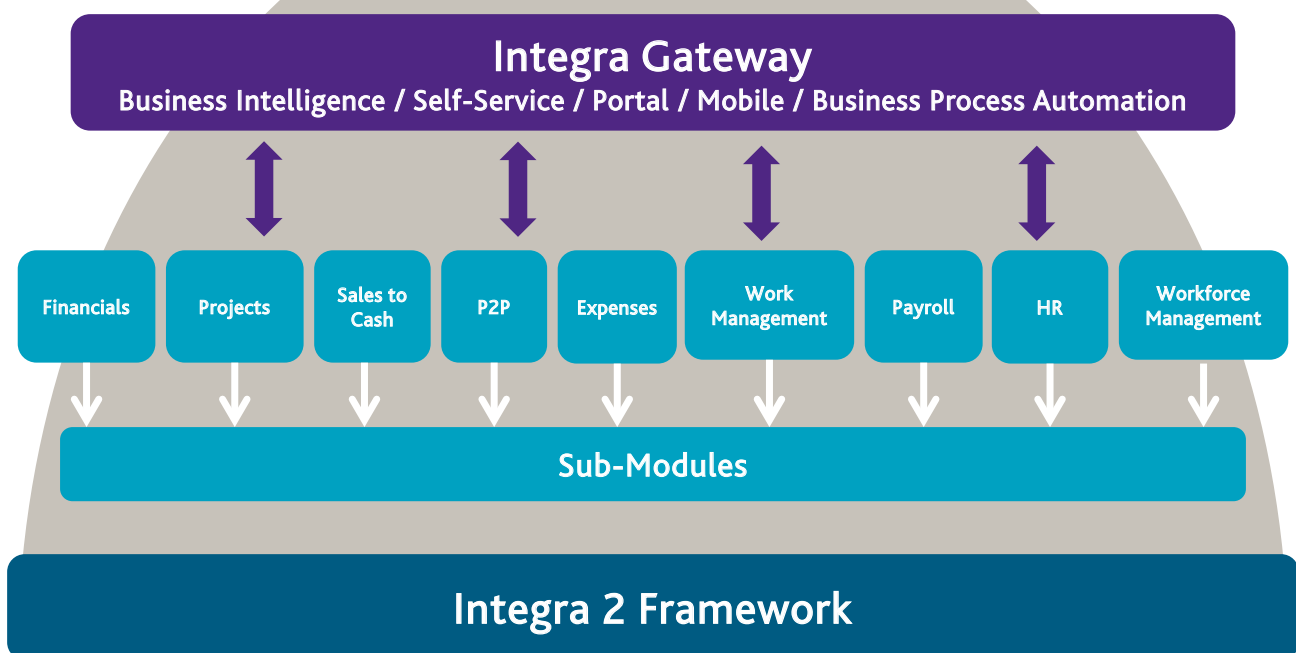

What is Integra Reach?

Leading business solutions provider Capita has teamed up with specialist HR and Payroll software supplier, Core HR to offer a new and unbeatable Enterprise Resource Planning (ERP) system. The new system, Integra Reach, combines and unifies all HR, Payroll and Finance business processes so that they can be managed from a single place. Available as a hosted service or a cloud based solution, Integra Reach offers the advantages of best-in-breed solutions, in terms of capability and price, with the benefits of dealing with a Tier 1 provider in terms of ownership and integration.

Available in the cloud as a solution or as a service, Integra Reach delivers best-in-class capability along with the price benefits of a best-in-breed solution but with the significant ownership and integration advantages normally only associated with a Tier 1 integrated ERP solution.

Integra Reach

Seamless integration with the Integra Reach suite of solutions

Integra Reach is designed to meet the needs of today's complex organisations. It's highly flexible and built using 'open standards' software so it seamlessly combines with the existing Capita Integra suite of e-procurement and finance management solutions. All Integra modules are available as single or combined components that can be selected according to customer need or requirement.

Each module fully integrates with the others to deliver one of the highest performing ERP and finance systems available on the market today.

This means that organisations of all sizes can now use a single world-class, fully integrated solution to manage all their accounts, payroll and HR activity.

Why do I need Integra Reach?

All organisations need an effective ERP system to manage their real time business processes and HR requirements. But all too often, systems on the market are expensive, inflexible and based on static ways of working. Today's fast moving, agile organisations need a flexible, customisable solution designed to grow and adapt with them as their business evolves over time.

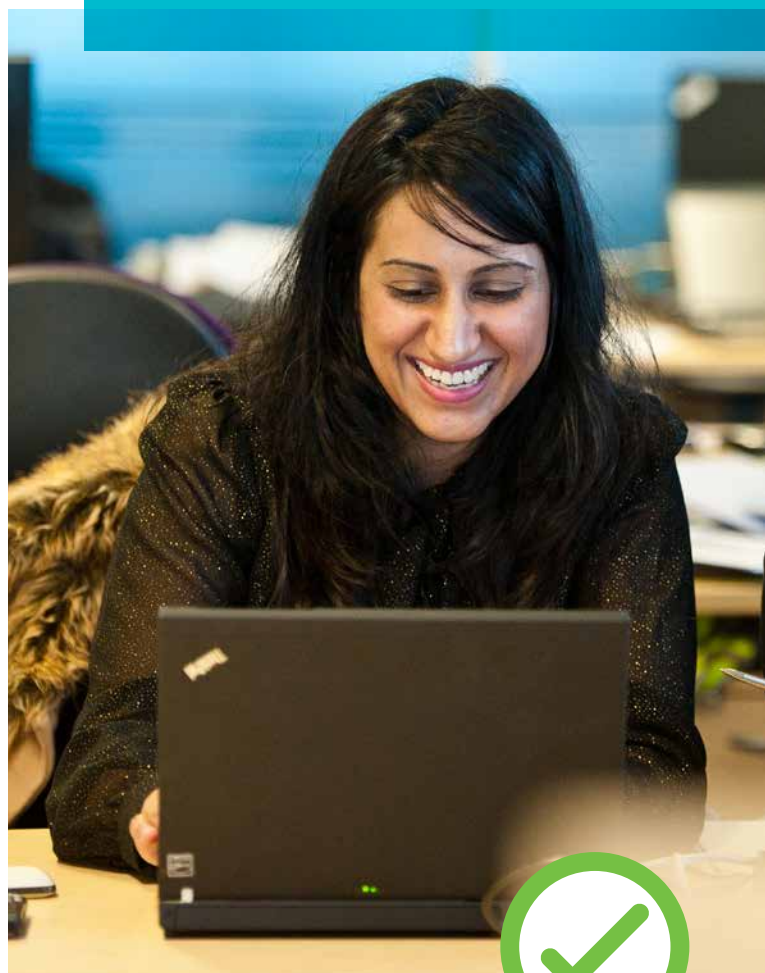

Many organisations have got around this problem by purchasing disparate systems or bolting on 'agile' components, but this often creates more problems (and adds more cost) in the longer term, with multiple supplier contracts and databases across the company. Integra Reach enables organisations to focus all this vital functionality into a single, best of breed solution from a sole supplier. This powerful yet highly flexible solution is proven to save time, money and effort in the management of all HR related activities. What's more, Integra Reach is fully agile, meaning that staff can use the system when, where or how they want both in and out of the office environment.

Integra Reach enables organisations to:

- Reduce costs and improve operational efficiency leading to improved operational performance and profitability
- Automatically produce highly detailed, granular reports on all aspects of the organisation
- Manage all aspects of the employee relationship with the ability to perform reviews whilst carrying out complex benefits administration activities
- Reduce the time taken to input data across multiple systems and to significantly improve data accuracy
- Embed agreed business processes into every stage of the business operation using highly flexible workflow routines which can be tailored to meet highly specific requirements
- Seamlessly integrate critical data to enable organisations to make effective management decisions and empowers employees to take ownership and responsibility for their own data

As well as delivering agility and flexibility, Integra Reach also helps organisations to achieve their broader environmental objectives, as it is available as a cloud based solution. This takes away the costs of hosting servers in-house thereby reducing energy bills and the organisation's carbon footprint.

Integra Reach empowers organisations to reduce their administration load and focus on meeting the needs and expectations of their staff, suppliers and customers.

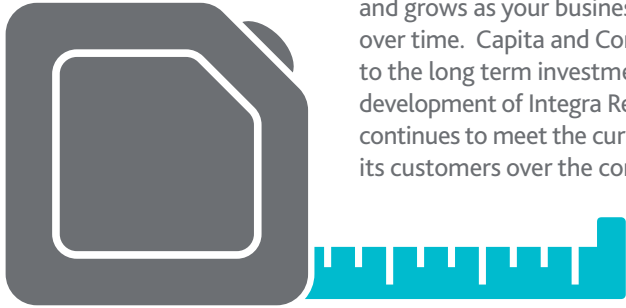

Key benefits of Integra Reach

- ✓ Single supplier owned – one number to call when help is needed
- ✓ Combines the specialist skills of two leading companies to create a secure, streamlined and fully integrated solution
- ✓ Easy, quick, intuitive and highly user friendly
- ✓ Increased accuracy and efficiency of all HR, payroll and finance related processes
- ✓ Enables organisations to move to a paperless environment
- ✓ Online and agile – staff can access the system when, where or how they need
- ✓ Instant access to up to date, accurate workforce statistics whenever and wherever they are needed
- ✓ A best of breed solution delivering cutting edge, future proofed software development

Future proofed technology

Integra Reach has built in flexibility so it expands and grows as your business evolves and develops over time. Capita and Core HR are committed to the long term investment in the on-going development of Integra Reach to ensure it continues to meet the current and future needs of its customers over the coming years.
